The Views of 60+ Residents and Community Leaders

Data collected and report prepared by GfK NOP
AARP is a nonprofit, nonpartisan membership organization that helps people 50+ have independence, choice and control in ways that are beneficial and affordable to them and society as a whole. We produce *AARP The Magazine*, published bimonthly; *AARP Bulletin*, our monthly newspaper; *AARP Segunda Juventud*, our bimonthly magazine in Spanish and English; *NRTA Live & Learn*, our quarterly newsletter for 50+ educators; and our website, AARP.org. AARP Foundation is an affiliated charity that provides security, protection, and empowerment to older persons in need with support from thousands of volunteers, donors, and sponsors. We have staffed offices in all 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands.

Acknowledgements

An AARP project team provided advice and counsel for this study. Bob Prisuta, Ed Evans, and Linda Barrett of AARP’s Knowledge Management contributed to the questionnaire design. Linda Barrett directed implementation of the survey, analysis and report preparation with GfK NOP. We would like to thank Elinor Ginzler, Director of Livable Communities Strategy in AARP’s Office of Social Impact for valuable guidance throughout this project.

Aging, Migration, and Local Communities:  
The Views of 60+ Residents and Community Leaders
Background and Objectives

Over the past several decades, demographers, sociologists, psychologists, community planners, politicians, business leaders, and others have studied with increasing interest the wide-ranging ramifications of America’s aging population and shifting regional demography.

AARP, in its efforts to best serve the country’s older Americans, has just completed a comprehensive survey on the impact aging populations can have on local communities and is making the findings available for the first time in this report. To ensure different perspectives were measured and understood, the survey was conducted among age 60+ residents as well as community leaders in selected communities.

Residents age 60 and over

To examine this issue in more detail, we interviewed people in select counties that met the following criteria:

- counties which have a large number (if not proportion) of movers age 60 and over who have moved within the past 5 years to their current county of residence. We refer to this group as new residents who live in communities with a high number of movers age 60+.
- counties which have a large proportion (if not number) movers age 60 and over those who have moved within the past 5 years to their current county. We refer to this group as new residents who live in communities with a high proportion of movers age 60+.
- counties which have minimal in-migration of age 60+ residents, and a long-term stable group of residents age 60+. We refer to these people as long term residents who are aging in community (lived in their current community for 5 or more years). Half of these counties are urban and half are rural. As a result four groups of age 60+ residents were surveyed for this study.

Survey topics include the constellation of “push and pull” factors that encourage people to either relocate or stay in their community as they age; personal engagement with the community; overall satisfaction with the county; and satisfaction with specific county services and offerings.
Community leaders

In each of these counties we also surveyed a cross section of community leaders from the government, business, religious, educational, and social service sectors, in order to get their perspective on what the aging of their counties means to them (n = 149). While a precise margin of error cannot be calculated for this sample due to the diversity, complexity, and unknown total population size, the qualitative results are instructive for directional context and overall impressions. Topics include their perceptions of county demography; extent to which age 60+ resident concerns are understood, appreciated, and acted upon; and the perceived benefits and challenges of hosting a large/growing aging population.
Survey Methods

Survey of age 60+ residents

Interviewing dates, method and timing
All interviews were conducted by telephone (CATI) at GfK NOP interviewing facilities from September 15 to October 4, 2005. The survey took approximately 22 minutes, on average, to administer.

Sample
A total of 1,201 interviews were conducted — 30 interviews in each of the following 40 communities (a full demographic description of these counties appears in Appendix 1):

1) Moved within past 5 years to a county with a high proportion of movers age 60+ (N = 301):

- Sumter County, Florida (Orlando)
- Douglas County, Colorado (Denver)
- Washington County, Utah (Salt Lake City)
- James City County, Virginia (Norfolk)
- Williamson County, Texas (Austin)
- Pinal County, Arizona (Phoenix)
- Beaufort County, South Carolina (Savannah, GA)
- Placer County, California (Sacramento)
- Cumberland County, Tennessee (Knoxville)
- Deschutes County, Oregon (Bend)

Of the four types of communities surveyed, respondents in this group are youngest (68 years old on average), the best educated (51% have a college degree or more), and report the highest household incomes (mean = $51,900). Most are not working (86%) and married (79% -- more than in the other three community types). They are overwhelmingly white (94%).

Half (51%) say they live in a senior/retirement community. Virtually all own their home (92%), generally a single-family home (87%).

Respondents in these counties are slightly more likely to be women (54%) than men (46%), but it is the most evenly balanced of the four types of counties surveyed, where women comprise a clear majority. For demographic details see Appendix I.
2) Moved within past 5 years to a county with a high number of movers age 60+ (N = 300):

- Maricopa County, Arizona (Phoenix)
- Riverside County, California (Los Angeles)
- Clark County, Nevada (Las Vegas)
- Broward County, Florida (Miami-Fort Lauderdale)
- San Diego County, California (San Diego)
- Pinellas County, Florida (Tampa-St Petersburg)
- Lee County, Florida (Ft Myers-Naples)
- Pima County, Arizona (Tucson)
- Ocean County, New Jersey (New York)
- Suffolk County, New York (New York)

Of the four types of communities surveyed, respondents in this group are among the youngest (69 years old on average) and among the best educated (39% have a college degree or more). They report annual household incomes of $44,600, on average. Most are not working (85%) and two-thirds are married (68%). Nine in ten are white (92%).

Over half (57%) say they live in a senior/retirement community, the highest proportion in any of the four county types surveyed. Most own their home (79%); half live in a single-family home (53%).

Of the four types of communities surveyed, women comprise the largest majority in this group, outnumbering men by close to a 2-to-1 margin (64% versus 36%, respectively). For demographic see Appendix I.

3) Have lived for past 5-plus years in a metro/urban county N = 300):

- Erie County, New York (Buffalo)
- Allegheny County, Pennsylvania (Pittsburgh)
- Wayne County, Michigan (Detroit)
- Lucas County, Ohio (Toledo)
- Kanawah County, West Virginia (Charleston)
- Milwaukee County, Wisconsin (Milwaukee)
- St. Clair County, Illinois (St Louis)
- Rockingham County, North Carolina (Greensboro)
- Pottawattamie County, Iowa (Omaha)
- Hampden County, Massachusetts (Springfield)
Of the four types of communities surveyed, respondents in this group are among the oldest (73 years old on average) and are the least likely to be married (57%). Women outnumber men (59% versus 41%, respectively).

One in three (32%) have a college degree or more. They report annual household incomes of $43,000, on average. Most are white (86%); Hispanics in these counties are more represented than in the other community types surveyed (8%).

Few (7%) live in a senior/retirement community, the lowest proportion in any of the four county types surveyed. Most own their home (86%), generally a single-family home (80%). For demographic details see Appendix I.

4) Have lived for past 5-plus years in a non-metro/rural county (N = 300):

- Burke and Sheridan Counties, North Dakota (Minot) - treated as one given small size of each and proximity
- Zavala County, Texas (San Antonio)
- Marshall County, South Dakota (Sioux Falls)
- Union County, South Carolina (Union)
- Pierce County, Nebraska (Sioux City)
- Harlan County, Kentucky (Knoxville)
- Webster County, West Virginia (Clarksburg)
- Hardin County, Ohio (Kenton)
- Aroostook County, Maine (Presque Isle)
- St Lawrence County, New York (Watertown)

Of the four types of communities surveyed, respondents in this group are among the oldest (72 years old on average), are least likely to have a college degree (24%), and report the lowest household incomes (mean = $32,000). Most are not working (78%). Two in three are married (68%). Most are white (90%). Women outnumber men (57% versus 43%, respectively).

Few (11%) live in a senior/retirement community. Most own their home (91%), generally a single-family home (86%). For demographic details see Appendix I.

Random-digit-dialing (RDD) procedures were used to select representative samples within each county. Counties were selected for the study because they are among the top counties in each of the four categories according to U.S. Census data.
Weighting
Completed interviews were weighted so that, within both the new and long-term resident populations, respondents are represented in the total proportional to the size of the county they live in. Moreover, in the long-term resident population, respondents were weighted to age within sex CPS data. Neither sex nor age target data were available for the new residents.

Reading note
In the tables, each column is headed by a letter ("a," "b," or "c"). If a proportion in a given row is higher (i.e., statistically significant at a 95% confidence level) than a comparable proportion in the row, the higher value will be followed by the column letter of the lower proportion. For example, if a proportion in column b is higher than the proportion in column c, the proportion in column b will be followed by a “c.”

Survey of Community Leaders

Interviewing dates, method and timing
All interviews were conducted by telephone (CATI) at GfK NOP interviewing facilities from September 29, 2005, to January 9, 2006. The survey took approximately 20 minutes, on average, to administer.

Sample
A total of 149 interviews were conducted in 30 counties. Sample lists were assembled by a Roper project director who researched each of the counties surveyed.

In each county, five interviews were conducted, each in a different sector. The sectors are:

- Business/economy (e.g., president of the chamber of commerce and/or business development)
- Government (e.g., political leaders)
- Religious community (e.g., religious or interfaith leaders)
- Education (e.g., superintendent of education who is knowledgeable about the relationship between the property tax base which supports school budgets)
- Family (e.g., director of social services).

In total, therefore, 30 interviews were conducted among each type of leader, five interviews in each community (with the exception of Pima, AZ, in which we could not obtain an interview with someone in the education sector).

The counties were stratified into four groups which match our group of 60+ residents:
1) Contains a high proportion of movers age 60+ (N = 50):

- Douglas, Colorado
- Sumter, Florida
- Beaufort, South Carolina
- James City, Virginia
- Pinal, Arizona
- Deschutes, Oregon
- Cumberland, Tennessee
- Placer, California
- Williamson, Texas
- Washington, Utah

2) Contains a high number of movers age 60+ (N = 48):

- Pinellas, Florida
- Pima, Arizona
- Broward, Florida
- Lee, Florida
- San Diego, California
- Ocean, New Jersey
- Clark, Nevada
- Suffolk, New York
- Maricopa, Arizona
- Riverside, California

3) Contains long term residents who are aging in urban counties (N = 25):

- Lucas, Ohio
- Wayne, Michigan
- Allegheny, Pennsylvania
- Erie, New York
- Kanawah, West Virginia

4) Contains long term residents who are aging in rural counties (N = 26):

- Harlan, Kentucky
- Pierce, Nevada
- Union, South Carolina
- Zavala, Texas
- Marshall, South Dakota
Key Findings

To move or to stay

Reasons to move

Movers age 60+ are prompted to leave a community for a variety of reasons. Overall, key reasons include:

- Weather (31%)
- Lack of proximity to friends and family (19%)
- Financial considerations — Many leave communities due to high cost of living (10%), high local taxes (8%), and lack of affordable housing (3%).
- Unpleasant living conditions — traffic congestion (7%), high crime (5%), and overcrowding/overpopulation (5%).

Disagreeable weather/climate is a chief motivator for people to leave a community. However, because counties with high 60+ in-migration are disproportionately located in areas featuring a mild climate, climate is a relatively unimportant incentive for people to move to a particular community (4%).

The 60+ who move most often say they relocated:

- to be closer to children (24%)
- because other family lives here (12%)
- because friends live here (9%)

Relatively few say they move to be in a retirement community (5%), because they “always wanted to live” in the community (4%), for work or job opportunities (3%), because of something they read (3%), or because they happened to find a house in the community they like (3%).

Reasons to stay

While areas with little in-migration might seem unattractive to some people, long-term residents frequently say they stayed in their communities after turning 60 because of the proximity to family (21%), or their children (10%).
Other top reasons include:

- Like my current home (14%)
- Current job or job opportunities (12%)

One in five have “never thought about it” (19%), suggesting they had never considered leaving.

*Making the decision to move*

The decision to move to a specific community attracting older persons is often made at fairly short notice — i.e., “soon before the move” (58%). Fewer than half (38%) say they had been planning to move to the community for “a long time.”

*Attachment to the community*

*Community involvement and emotional connection*

Generally speaking, most movers (70%) say they are “not very” or “not at all” involved in the affairs of their local community. Movers who relocated to communities with a high number of movers age 60+ (75%) are particularly likely to say they are not involved in the affairs of their local community compared to those who relocated to communities with a high proportion of movers age 60+ (65%). On the other hand, only about half (52%) of long term residents who are aging in stable communities say they are “not very” or “not at all” involved in the affairs of their local community.

Emotional connection to the community depends largely on whether one is a long term resident or a mover, and the type of community the person lives in. Long term residents who are aging in stable communities (76%) are more likely than movers (55%) to say they feel emotionally connected to their community. Long term residents aging in rural communities (79%) and those who moved to communities with a high proportion of 60+ movers (64%) are also more likely to say they feel emotionally connected to their community than those who moved to communities with a high number of movers age 60+ (46%).

*Social isolation and involvement with the world*

Regardless of whether they are new, or long term residents, few people age 60+ (one in five or less) say they “frequently feel isolated from other people.”
Conversely, about three-quarters of both new and long term residents say they “mostly” or “completely” agree with the statement “I am involved with the world and the people around me. People who moved to communities with a high proportion of movers age 60+ (82%) are more likely to say this than people who moved to communities with a high proportion of new residents age 60+ (74%).

*Political fit*

When asked to think about the social and political climate of their town and how it compares with their personal views, almost two-thirds (64%) of long term residents aging in their community say other people in their community are about like them. Significantly fewer new residents who moved (57%) say the same. Overall, the one in three not “in sync” politically or socially are twice as likely to say their fellow residents are more conservative (20%) than more liberal (11%) than they, a finding that is consistent with the general shift of population from the upper Midwest and North to the South and West.

*Overall impressions and satisfaction with the community*

*Personal satisfaction*

Virtually all of the new residents who moved say they are “satisfied” with their chosen county regardless of whether they live in a county with a high number of movers age 60+ (90%) or a county with a high proportion of movers age 60+ (91%). In fact, and a solid majority (63%) say they are “very satisfied” with their county as a place to live. Although most new residents (85%) say that if they could do it all over again, they would move to same county, those who moved to a community with a high proportion of movers age 60+ are more likely to say they would do it all over again than those who moved to a community with a high number of movers age 60+ (88% versus 81%).

While most long-term residents (82%) who are aging in stable communities say they are “satisfied” with their county as a place to live, long term residents who are aging in rural communities (68%) are more likely to say they are “very satisfied” than their counterparts living in urban communities (38%).

Both new (32%) and long term residents (39%) say what they like most about their county is its community life and atmosphere. Other frequently mentioned responses include the weather/climate (32% new, 19% long term residents) and the scenery/closeness to nature (19% and 13%, respectively).
Rating the local government

Based on their personal experiences or observations, new residents (51%) are more likely than long term residents (43%) to say they think the local county government does an “excellent” or “good” job meeting the needs of residents age 60 and over. When we look at the four types of communities studied, new residents living in communities with a high proportion of 60+ movers (52%) and long term residents living in rural communities (52%) are more likely to say they think the local county government does an “excellent” or “good” job meeting the needs of residents age 60 and over than long term residents in urban communities (34%).

For their part, community leaders feel their peers are doing a good (58%) – though not excellent (19%) – job “addressing the needs and concerns of age 60+ residents.” The findings suggest that leaders in stable urban communities are most critical of local leaders' performance (40% fair/poor, vs. 22% among all leaders).

Is it a good place for the 60+?

New residents in communities with a high proportion of movers age 60+ give high marks to their county as a place for people age 60+ to live, with about nine in ten (88%) rating it as “excellent” or “good.”

Long-term residents in stable areas also give fairly high marks – though not as high as new residents – to their county as a place for people age 60+ to live, with about two in three (67%) rating it as “excellent” or “good.”

On this score, residents and community leaders are in accord. Three in four community leaders, in both growth and stable regions, agree their county is “above average” or “one of the best in the country” for people age 60 and over to live in (77%).
Importance of 60+ residents to community life

Community leaders have a positive view of their county’s age 60+ residents. Half (49%) believe such residents contribute more than they take from their communities, and the balance say it’s about an “even mix” (46%). Very few (5%) believe the 60+ take more than they give. Leaders in the religious community (57%), local government (53%) and social services (52%) appear especially likely to say the 60+ community makes a net contribution.

Asked how vital a role the 60+ play in specific areas of community life, majorities of county leaders say they play an “essential” or “very important” role in local religious life (84%), business (82%), social services (72%), and local government (66%). Only when asked about education do fewer than half of the leaders say the 60+ play at least a very important role (46%), though over half (55%) of education leaders think they do.

Community leaders mention a range of contributions made by the 60+, chief among them the following: good pool of volunteer workers (38%; including 57% of local government leaders); they have experience others can learn from (34%); they provide economic benefits such as purchasing power, high taxable incomes, etc. (36%); and they are solid/good/moral citizens (19%). Leaders in counties with a growing proportion and percentage of 60+ residents appear more likely than leaders in stable urban and rural communities to cite the economic benefits and volunteerism of older residents, as well as their experience. Leaders in stable urban communities tend to describe the benefits of the 60+ population to stem from their status as good citizens (40%, vs. 19% of all leaders).

Leaders also mention a range of challenges created by the 60+ in their counties. Most often mentioned are healthcare/medical needs of seniors (46%), special transportation needs (21%), the need for social (9%) and home care (7%) services for seniors, and the fact that some are low income (9%).

Leaders in the social services sector seem most aware of the growing 60+ population in their county (62% say it is “growing quickly,” vs. 45% of all leaders). Also, leaders in counties with high percentage (62%) and volume (56%) growth of 60+ residents are more likely to say this community is growing “quickly” (compared to 16% in stable urban and 19% in stable rural counties).

Do local communities pay enough attention to age 60+ residents?

Despite satisfaction with their communities, many age 60+ residents — new and long-term alike — believe “this county really needs to start paying more attention to the needs of its age 60+ residents” (55% and 76%, respectively).
Moreover, many residents sometimes feel “that the county government takes for granted its tax revenue from over-60 residents,” though long-term residents (62%) agree more strongly than new residents (47%).

Community leaders appear to be aware of this sentiment and, to some extent, agree with it. By about a six to one margin, community leaders believe their “county really needs to start paying more attention to the needs of its age 60+ residents” (44%) rather than that “sometimes this county puts too much emphasis on the needs of its over-60 residents, at the expense of others” (7%).

**Meeting the needs of 60+ residents**

Most (77%) community leaders feel *others* in their sector have done a “good” (58%) or “excellent” (19%) job addressing the needs and concerns of their age 60+ residents. In comparison, they rate their *own* understanding of the needs and concerns of their 60+ residents somewhat higher than others in their sector. Most (84%) feel they have a “good” (55%) or “excellent” (29%) understanding of the needs and concerns of the age 60+ residents.

Local government leaders (47%) and social services (38%), who may hear more from and have more direct contact with the 60+ community, appear more likely to rate their understanding as “excellent.” By county type, leaders in stable rural counties seem less likely than others to deem their understanding as “excellent” (12%; vs. 40% of leaders in stable urban counties).

Slightly more than half of the community leaders agree that their communities had “made a special effort to encourage persons age 60 and over to move or stay there.” Perhaps the less than perfect understanding of their 60+ residents’ concerns stems, in part, from the residents themselves. Community leaders are more likely to say the 60+ population does a “good” (40%) than “excellent” (30%) job of letting them know their special needs and concerns.

**Satisfaction with community services/attributes most important to 60+ residents**

*New residents (movers)*

When we correlate satisfaction ratings of 21 county services and attributes with overall satisfaction with the county, the five that most drive satisfaction among new residents are:

1. Opportunities to meet and make friends with other people age 60 and over
2. Low pollution, good air and water quality
3. Affordable cost of living
4. High quality local government services
5. Adult education opportunities

If we look at importance of offerings by satisfaction with those offerings, it becomes clear why so many new residents are satisfied with the county they moved to — many of the most important offerings garner the highest satisfaction ratings: opportunities to make age 60+ friends (81% say they are “very” or “somewhat satisfied” with county), low pollution/good air and water quality (84%); good hospitals (74%); and affordable cost of living (73%).

Long-term residents aging in community

The top 5 key drivers of satisfaction among long-term residents are:

1. High quality local government services
2. Low pollution, good air and water quality
3. Low local taxes
4. Low crime
5. Employment opportunities

If we look at importance of offerings by satisfaction with those offerings, we see why only half (53%) of long-term residents are “very satisfied” with their county. One attribute that ranks near the top in terms of importance — low local taxes — ranks in the lower third of the satisfaction ratings (46% are “very” or “very satisfied” with their county in this respect). Moreover, two other attributes of high importance — high quality local government services and low crime — rank in the middle of the satisfaction ratings (68% and 68%, respectively). Only one item in the top rank of importance — low pollution/good air, water quality — ranks near the top in terms of satisfaction.

Community leaders

When we asked community leaders to rate the importance and quality of public and private services in their county (for residents age 60+) half of the time they identified items that the 60+ residents rated as key drivers of their level of satisfaction with their county. The five out of ten items identified by both leaders and residents age 60+ are:

- Affordable cost of living (90%)
- Low crime (85%)
• Opportunities to meet and make friends with peers (83% believe it is “essential” or “very important” to their age 60+ constituents)
• High quality local government services (77%)
• Low local taxes (74%)

They are less likely to perceive the other key drivers for the 60+ community as important — low pollution/good air and water quality (62%), adult education opportunities (46%), and employment opportunities (44%).

Of the top priorities of 60+ residents, community leaders favorably rate the quality of their county’s local government services (79% “excellent/good”) and the opportunities to meet and make friends (82%), and say they are doing a good but improveable job on “low crime” (72%). Fewer rate their counties’ performance as favorably in the key areas of low local taxes (54% “excellent/good”) and an affordable cost of living (53%).

**Top Priorities Over the Next 5 Years**

New residents say the top priorities for county government over the next 5 years should be to:

• Lower taxes (23% of new residents, 29% of long-term residents)
• Relieve traffic congestion (16% and 1%, respectively)
• Provide better/more transportation (15% and 19%)
• More affordable housing (14% and 11%)
• Affordable/quality healthcare (13% and 15%)
• Quality of roads (11% and 5%)
• Providing a variety of housing options for older citizens (5% and 16%)
Part 1: Profile of Residents Who Have Moved to Their County in the Past 5 Years
1. Deciding to Move: The Process

Motivators to uproot

The 60+ are prompted to move away from communities for a variety of reasons, including:

- The weather/climate (31%).
- Lack of proximity to friends and family (19%).
- Financial considerations — Many leave communities due to high cost of living (10%), high local taxes (8%), and lack of affordable housing (3%).
- Unpleasant living conditions — traffic congestion (7%), high crime (5%), and overcrowding/overpopulation (5%).

Other reasons include simply wanting to change house/dwelling (6%), age and/or health issues (5%), and wanting to live in a place more suitable for retirement (3%).

Some differences by age are apparent: 60-69 year olds are particularly likely to want to move due to unaffordable cost of living (12%), high taxes (9%), and high crime (7%). Those 70 and older are likely to move to be closer to friends/family (27%) or for age/medical reasons (10%).

Attractions of new communities

Though disagreeable weather/climate is a chief motivator for people to leave a community, better climate is a relatively unimportant incentive for people to move to a community (4%).

The importance of family is emphasized by the desire of the 60+ to be closer to children (24%, especially among those age 70 and older, 32%, and women, 28%), other family (12%), and friends (9%). Communities with a high number of new 60+ residents are especially likely to attract people who want to be near their children. This mirrors the general population shift away from the Midwest and Northeast to the South and West.

Relatively few say they move to be in a retirement community (5%), because they “always wanted to live” in the community (4%), for work or job opportunities (3%), because of something they read (3%), or because they happened to find a house in the community they like (3%).
### Chief Reasons Left Former Community for Current One
- **Most common responses**

**Base:** Age 60+ and moved to county in past 5 years.

Which one of the following reasons most influenced your decision to move to [COUNTY] County? (Q3a)
Making the decision to move

The majority of those who move to a communities with a high growth of the 60+ population make the decision to do so with their spouse/partner (62%), particularly those who move to communities with a high proportion of residents age 60 and over (67%).

About one in four (27%), many of whom do not have a partner or spouse, make the decision to move by themselves, often to communities with a high number of new 60+ residents.

Relatively few say their spouse alone (6%) or someone else (6%) made the decision for them (though 11% of new residents age 70-plus in a high growth area say someone else made the decision for them).

Primary Decision-Maker Regarding Move to County

Who in your household made the primary decision to move to [COUNTY] County? Was it made mostly by you, your spouse, both you and your spouse together, or by someone else? If you have lived here since you were a child, just let me know. (Q1)
When the decision to move was made

The decision to move to a specific 60+ high-growth community is often made at fairly short notice — i.e., “soon before the move” (58%, especially among those age 70-plus, 64%, likely due to sudden health issues). Fewer than half (38%) say they had been planning to move to the community for “a long time.”

Did you make the decision to move to [COUNTY] County shortly before you moved here, or had you been planning to move here for a long time? (Q2)
2. Personal Engagement With the Community

Community involvement

Generally speaking, relatively new 60+ residents in an area with a new and growing 60+ population are not much involved in their communities — seven in ten (70%) say they are “not very” or “not at all” involved. This is particularly true in counties that have large numbers but not a high proportion of new 60+ residents (75%).

Very few (4%) consider themselves “very involved” in their communities.

<td>1</td>
<td>*</td>
</tr>
</tbody>
</table>

Generally speaking, how involved are you in the affairs of your local community? Are you very involved, somewhat involved, not very involved, or not involved at all? (Q10)
Social isolation

Lack of involvement in the community, however, does not appear to translate to feelings of social isolation — e.g., while 70% of new residents in high 60+ growth areas say they are not much if at all involved in their community, only about one in five (18%) agrees he or she “frequently feels isolated from other people.”

In fact, about eight in ten (78%) agree they are “involved with the world and the people around me,” particularly those in communities with a high proportion of new age 60+ residents (82%), communities in which senior residents presumably play a relatively large role in civic life. New residents age 60-69 are especially likely to agree (82%).

*Emotional connection to the community* differs depending on the type of community the person moved to. Counties in which 60+ residents are rapidly increasing engender emotional connection among a majority (64%) of those who recently moved there. On the other hand, less than half (46%) of those who moved to communities with a high number but not high proportion of 60+ residents feel the same way.

Aging, Migration, and Local Communities:
The Views of 60+ Residents and Community Leaders
### Political fit

The majority of new residents in high 60+ growth areas tend to say they fit politically with their community — 57% say people are “about like me” in terms of social and political views.

Interestingly, however, the one in three not “in sync” politically are twice as likely to say their fellow residents are more conservative (22%) than more liberal (9%) than they, consistent with the shift from the Midwest and Northeast to the South and West. Men are more likely than women to say they are less liberal than the community (14% versus 6% respectively). Residents age 60-69 are more likely than those age 70-plus to say they are less conservative than the community (26% versus 15%, respectively).

*Thinking about the social and political climate of your town compared to your own personal views, would you say people in your town are more conservative than you, more liberal, or about the same? [IF “CONSERVATIVE” OR “LIBERAL”, ASK:] Somewhat or much more so? (Q8)*
3. Overall Satisfaction With County of Residence

Overall Satisfaction

Virtually all of the new residents of high 60+ growth areas surveyed say they are “very” or “somewhat satisfied” with their chosen county (90%), and a solid majority — 63% — say they are “very satisfied.”

Reflecting this satisfaction, most also say that, if they could do it all over again, they would move to same county (85%). This is particularly the case among new residents of counties with a high proportion of new age 60+ residents, counties in which new residents are most likely to feel involved and emotionally engaged.

Top of Mind Favorite Aspects of County

New residents in high 60+ growth areas mention a number of things they like about their county, but what they like most are:

- The community life and atmosphere (32%, especially those in counties with a high proportion of new age 60+ residents, 38%)
- The weather/climate (32%)

Other relatively frequent mentions include:

- Scenery/closeness to nature, outdoor living (19%)
- Amenities/facilities (18%), such as access to shopping, stores, and restaurants (9%)
- Proximity to family and friends (7%, particularly among those in communities with a high number but not high proportion of age 60+ residents)
- Cost of living (6%)
- Educational/cultural facilities (4%)

Women are particularly likely to mention access to shopping/stores (12%), while men mention cost of living (10%).

Residents age 60-69 are especially likely to cite the weather (36%) and scenery/closeness to nature (22%).

*Putting aside your own satisfaction level for a moment, how would you rate [COUNTY] County as a place for people 60 and over to live — excellent, good, fair, or poor? (Q7)*
Rating the local government

The new residents’ high rating of their high-growth 60+ county appears to be based on factors besides their perception of the ability of the local county government to meet “the needs of residents age 60 and over.” Asked to rate their county government in terms of meeting the needs of age 60+ residents, only about half (51%) offer an “excellent” or “good” rating, irrespective of the relative proportion of age 60+ residents comprising the town. Only one in twelve (8%) offers an “excellent” rating.

Others don’t offer an opinion (24%) or give the local government a “fair” or “poor” rating (25%).

<table>

*Based on your personal experience or observations, do you think the local county government does an excellent, good, fair, or poor job of meeting the needs of residents age 60 and over? (Q9)*
**Taking age 60+ residents for granted?**

Accompanying the relatively mediocre ratings of local government’s ability to serve its 60+ residents is the sentiment that “this county really needs to start paying more attention to the needs of its age 60+ residents” (55%).

Many new residents of high 60+ growth areas also sometimes feel “that the county government takes for granted its tax revenue from over-60 residents” (47%).

Aging, Migration, and Local Communities: 
The Views of 60+ Residents and Community Leaders
Where there is room for improvement

Despite the local government not being seen as meeting the needs of its 60+ residents, new residents are unlikely to cite government as among their least favorite aspects of the county. Those are:

- Traffic, congestion, overpopulation (22%), especially among residents of counties with a high number (if not proportion) of new age 60+ residents, counties that tend to be fairly urban.
- The weather/climate (14%), especially heat/hot summers (9%). This is interesting given that weather — especially cold weather — was among the most-often cited reasons new residents moved from their old locale.
- Lack of amenities/facilities (11%), particularly in communities with a large proportion of new age 60+ residents, which tend to be less urban and hence have fewer amenities
- Cost of living (8%)
- Community life/atmosphere (7%)

Residents age 60-69 are particularly likely to mention lack of amenities/facilities (13%); those age 70-plus are relatively likely to mention the weather/climate (18%).

*Again in your own words, what do you dislike most about [COUNTY] County? (Q5)*
4. Importance of and Satisfaction with Specific County Services and Offerings

Stated importance

Asked to rate the importance of various aspects of their county, new residents in high 60+ growth areas focus on the following essentials:

- **Nice environment:** Low pollution, good air and water quality (94%), not too much traffic congestion (73%)
- **Access to quality health care:** Good hospitals (93%) and high-quality doctors and specialists are close by (92%)
- **Safety:** Low crime (92%)
- **Economics:** Affordable cost of living (88%), low taxes (79%), affordable housing (75%)
- **Convenience and variety:** Close, convenient shopping and services (83%), a variety of housing options for older citizens (72%), convenient and reliable public transportation for people with physical disabilities (70%)

Women are more likely than men to say most of these items are “essential” or “important.”

Derived importance

When we correlate service and attribute importance with overall satisfaction with the county (a “derived importance” analysis), however, we see that some county attributes drive satisfaction to a greater extent than respondents may realize.

In fact, of the five attributes that correlate most highly with overall satisfaction, only two rank in the top five for stated importance:

1. Opportunities to meet and make friends with other people age 60 and over (stated importance ranking: 14)
2. Low pollution, good air and water quality (1 in stated importance)
3. Affordable cost of living (5 in stated importance)
4. High quality local government services (8 in stated importance)
5. Adult education opportunities (18 in stated importance)

It appears that social opportunities for new residents are of top importance with regard to overall satisfaction with their county, even if they say such opportunities are of relatively low importance. In other words, when people are asked to rate how essential a list of items are on a five point scale (essential to not at all important), having “opportunities to meet and make friends with other people age 60 and over”
is the fourteenth out of twenty-one items (stated importance). When we look at how each item is related to overall satisfaction with the county, having opportunities to meet and make friends becomes the most highly rated item. Moreover, key livable communities attributes such as low pollution, good air and water quality, along with high quality local government and adult education opportunities appear more important to residents age 60+ than originally stated.

*Please tell me whether each of the following is essential to you, very important but not essential, moderately important, only a little important, or not important at all when it comes to the community you live in. First... (Q12)*
Satisfaction with the most important community services and offerings

If we plot importance of offerings by satisfaction with those offerings (see table below), it becomes clear why so many new residents are satisfied with the county they moved to — many of the most important offerings garner the highest satisfaction ratings: opportunities to make age 60+ friends (81% say they are “very” or “somewhat satisfied” with county), low pollution/good air and water quality (84%); good hospitals (74%); and affordable cost of living (73%).

A number of attributes of moderate importance, however, garner relatively low satisfaction scores lower local taxes, less traffic congestion, better public transportation — better government services and more adult education opportunities — are of primary importance and receive only average satisfaction scores.

### Importance by Satisfaction Analysis of County Services and Offerings

Base: Age 60+ and moved to county in past 5 years.

How the map was constructed: The range of correlation scores for importance (Q12) by overall satisfaction (Q13), and of top 2 box scores for satisfaction on specific attributes (Q13), were calculated and divided into thirds. Items with a score in the top third of importance appear in the top row; items in the middle third appear in the middle row; items in the bottom third appear in the bottom row. Items with a score in the top third of satisfaction appear in the right column; items in the middle third appear in the middle column; items in the bottom third appear in the left column.

*Now please tell me whether you are very satisfied, somewhat satisfied, neither satisfied nor dissatisfied, somewhat satisfied, or very dissatisfied with [COUNTY] County when it comes to each of the following. First... (Q13)*
Top Priorities Over the Next 5 Years

As predicted by the importance by satisfaction grid, new residents in high 60+ growth areas say the top priorities for county government over the next 5 years should be to:

- Lower taxes (23%)
- Relieve traffic congestion (16%, especially in communities with a high proportion of age 60+ residents)
- Provide better/more transportation (15%)

Other priorities should include:

- More affordable housing (14%, especially in communities with a large number if not proportion of 60+ residents)
- Affordable/quality healthcare (13%)
- Quality of roads (11%, especially in communities with a high proportion of age 60+ residents)

Women are especially likely to focus on affordable housing (18%). Residents age 60-69 are more likely than older residents to mention low taxes (26%), affordable housing (17%), affordable/quality healthcare (16%), quality of roads (13%), and close/convenient shopping (11%).

In your opinion, over the next 5 years what should be the county government’s three top priorities to improve living conditions for residents age 60 and over? (Q17)
Part 2: Profile of Residents Who Have Lived For 5 or More Years in Stable, Low 60+ Growth Counties
5. Deciding to Stay: Key Motivators

Large numbers of the 60+ choose to remain in the stable counties we studied. Why? Long-term residents have stayed in their communities after turning 60 for a number of predictable reasons, chief among them are:

- Proximity to family (21%) and children (10%)
- Like my current home (14%)
- Current job or job opportunities (12%, especially men — 17%).

One in five have “never thought about it” (19%), suggesting they had never considered leaving.

*Which one of the following reasons most influenced your decision to stay in [COUNTY] County? (Q3b)*
6. Personal Engagement With the Community

Community involvement

Long-term residents are moderately involved in their communities — about half of (48%) say they are “very” or “somewhat” involved. Contrary to stereotypes, residents in urban areas are not less involved than those in rural areas (47% and 49%, respectively).

About as many, however, say they are “not very” or “not at all involved” (52%).

<table>

</tr>
</tbody>
</table>

*Generally speaking, how involved are you in the affairs of your local community? Are you very involved, somewhat involved, not very involved, or not involved at all? (Q10)*
Social isolation

About three in four (77%) long-term residents who are aging in stable communities agree they are “involved with the world and the people around me.” Moreover, fully three in four (76%) agree they feel emotionally connected to their community, a likely benefit of residing in one place for a long period of time.

In contrast, only 14% agree they “frequently feel isolated from other people.”

<table>
<thead>

</tr>
</tbody>
</table>

Please tell me whether you completely agree, mostly agree, neither agree nor disagree, mostly disagree, or completely disagree with each of the following statements. First... (Q11)
**Political fit**

A majority of long-term residents who are aging in stable communities say they fit politically with their community — 64% say people are “about like me” in terms of social and political views. This is particularly true among those age 70 and older (67%).

However, the three in ten not “in sync” politically are somewhat more likely to say their fellow residents are more conservative (18%) than more liberal (12%) than they.

Thinking about the social and political climate of your town compared to your own personal views, would you say people in your town are more conservative than you, more liberal, or about the same? [If “CONSERVATIVE” or “LIBERAL”, ASK:] Somewhat or much more so? (Q8)
7. Overall Satisfaction with County of Residence

Overall Satisfaction

Most long-term residents who are aging in stable communities say they are “very” or “somewhat satisfied” with their county as a place to live (82%), and half — 53% — say they are “very satisfied.” Satisfaction levels are markedly higher in rural counties — 68% are “very satisfied” versus only 38% who live in urban counties.

Satisfaction levels in these counties are similar to areas with a high influx of the 60+, indicating that people are generally happy whether they chose to move or stay in their community.

*On balance, how satisfied are you with [COUNTY] County as a place to live? [READ LIST] (Q6)
Top of Mind Favorite Aspects of County

Long-term residents aging in stable communities mention a number of things they like about their county of residence, largely dependent on whether they live in a rural or urban area. Rural residents (in common with residents of counties experiencing an influx of the 60+) are particularly likely to mention the following:

- The community life and atmosphere (39% in total, 57% in rural counties, 22% in urban counties)
- The weather/climate (19% total, 23% rural, and 15% urban).
- Scenery/closeness to nature (13% total, 20% rural, and 6% urban)

Residents of urban counties, however, are especially likely to mention:

- Amenities/facilities (12% total, 16% urban, and 9% rural)
- Educational/cultural facilities (6% total, 10% urban, and 2% rural)

Irrespective of the locale, top mentions also include “I’ve always lived here/it’s my home” (11%) and “my friends/family” (8%). Residents age 70 and older are relatively likely to mention the weather/climate (24%).

In general, long-term residents aging in stable communities tend not to mention service-based attributes.

*In your own words, what do you like best about [COUNTY] County? (Q4)*
Rating the county as a place for age 60+ residents

Long-term residents also give fairly high marks to their county as a place for people age 60+ to live, with about two in three (67%) rating it as “excellent” or “good.” Women are especially inclined to give such an appraisal (72%).

Rural counties appear to be doing a better job on this score — those living in such communities are particularly likely to say the county does an “excellent” job (28% versus 15% in urban counties).

</tbody>
</table>

Putting aside your own satisfaction level for a moment, how would you rate [COUNTY] County as a place for people 60 and over to live — excellent, good, fair, or poor? (Q7)
Rating the local government

The long-term residents' high rating of their county appears to be based on factors other than their perception of whether the local county government does a good job meeting the needs of their 60+ residents. When asked to rate their county government's ability to meet the needs of age 60+ residents, fewer than half (43%) say the county government does an “excellent” or “good” job. Only one in twenty (5%) say the local county government does an “excellent” job. However, nearly half (49%) of women rate the job the local government does in this area as “excellent” or “good.”

Again, rural counties garner higher ratings from residents — 52% say their county does an “excellent” or “good” job compared to only 34% of urbanites who make the same assessment. Indeed, 61% of long-term urban residents say their county does only a “fair” or “poor” job.

<table>
<thead>
<tr>

</tbody>
</table>

Based on your personal experience or observations, do you think the local county government does an excellent, good, fair, or poor job of meeting the needs of residents age 60 and over? (Q9)
Taking age 60+ residents for granted?

Accompanying the relatively low ratings of local government’s ability to serve its aging in place 60+ residents in these stable counties, is the sentiment that “this county really needs to start paying more attention to the needs of its age 60+ residents” (76%). This holds true for residents of both urban and rural counties.

Majorities also sometimes feel “that the county government takes for granted its tax revenue from over-60 residents” (62%), though this feeling is more widespread in urban than rural counties (67% versus 57%, respectively) and among 60-69 year old residents (68%).

Please tell me whether you completely agree, mostly agree, neither agree nor disagree, mostly disagree, or completely disagree with each of the following statements. First... (Q11)
Where there is room for improvement

As with favorite aspects of their community, long-term residents aging in stable counties mention a number of things they dislike about their county of residence, largely dependent on whether they live in a rural or urban area. Urban residents are particularly likely to mention the following:

- Cost of living (20% in total, 30% in urban counties, 9% in rural counties)
- Government/officials/politics (14%, 23% urban, and 5% rural)

Residents of rural counties are especially likely to mention:

- Weather/climate (12%, 20% rural, and 3% urban)
- Unemployment/lack of job opportunities (9%, 12% rural, and 5% urban)
- Lack of amenities/facilities (5%, 7% rural, and 3% urban)

Women are relatively likely to mention lack of amenities/facilities (8%) while men are likely to mention cost of living (25%) and government/officials/politics (20%).

Residents age 60-69 are more likely than older residents to mention unemployment/lack of jobs (13%) and the need for better highways/roads (7%).
### Least Favorite Aspects of County
- Most common responses -

Base: Age 60+ and have lived in stable 60+ county for 5 or more years.

*Again in your own words, what do you dislike most about [COUNTY] County? (Q5)*
8. Importance of and Satisfaction with Specific County Services and Offerings

Stated and derived importance

Asked to rate the importance of various aspects of their county, long-term residents aging in stable counties focus on the following factors:

- **Nice environment:** Low pollution, good air and water quality (91%)
- **Access to quality health care:** Good hospitals (92%) and high-quality doctors and specialists are close by (88%)
- **Safety:** Low crime (90%)
- **Economics:** Affordable cost of living (84%), low taxes (78%)
- **Convenience and variety:** Convenient and reliable public transportation for people with physical disabilities (77%), appropriate house of worship nearby (74%)

On many items, women assign greater importance than do men. Residents age 60-69 place relative importance on employment opportunities (77%) and not too much traffic congestion (66%), while those 70 and older are relatively likely to mention a nearby house of worship (79%).

Derived importance

When we correlate service and attribute importance with overall satisfaction with the county (a "derived importance" analysis), however, we see that some county attributes drive satisfaction to a greater extent than respondents let on.

In fact, of the five attributes that correlate most highly with overall satisfaction, two rank in the top five for stated importance:

1. High quality local government services (10 in stated importance)
2. Low pollution, good air and water quality (2 in stated importance)
3. Low local taxes (stated importance ranking: 6)
4. Low crime (3 in stated importance)
5. Employment opportunities (14 in stated importance)

*Please tell me whether each of the following is essential to you, very important but not essential, moderately important, only a little important, or not important at all when it comes to the community you live in. First... (Q12)*
Satisfaction with the most important community services and offerings

If we plot importance of offerings by satisfaction with those offerings (see table below), we see why only half (53%) of long-term residents are “very satisfied” with their county. One attribute that ranks near the top in terms of derived importance — low local taxes — ranks in the lower third of the satisfaction ratings (46% are “very” or “very satisfied” with their county in this respect). Moreover, two other attributes of high (derived importance) — high quality local government services and low crime — rank in the middle of the satisfaction ratings (68% and 68%, respectively). Only one item in the top rank of derived importance — low pollution/good air, water quality — ranks near the top in terms of satisfaction.

</tr>
</tbody>
</table>

How the map was constructed: The range of correlation scores for importance (Q12) by overall satisfaction (Q.6), and of top 2 box scores for satisfaction on specific attributes (Q13), were calculated and divided into thirds. Items with a score in the top third of importance appear in the top row; items in the middle third appear in the middle row; items in the bottom third appear in the bottom row. Items with a score in the top third of satisfaction appear in the right column; items in the middle third appear in the middle column; items in the bottom third appear in the left column.
### Satisfaction Level With Specific Aspects of County

*Now please tell me whether you are very satisfied, somewhat satisfied, neither satisfied nor dissatisfied, somewhat satisfied, or very dissatisfied with [COUNTY] County when it comes to each of the following. First… (Q13)*
Top Priorities Over the Next 5 Years

As predicted by the importance by satisfaction grid, long-term residents say the top priorities for county government over the next 5 years should be to:

- Lower taxes (29%, particularly among those in urban communities, 37%)
- Better/more transportation (19%, especially in rural areas, 24%)
- Providing a variety of housing options for older citizens (16%)
- Affordable/quality healthcare (15%)
- Affordable housing (11%)

In urban areas, lowering crime is cited by 12%. In rural areas, better employment opportunities is mentioned by 10%.

Men are particularly likely to mention lower taxes (37%) and quality of roads (8%), while women are more likely than men to focus on the need for a variety of housing options for older citizens (19%).

Residents age 60-69 are more likely than older residents to mention lower taxes (36%), affordable/quality healthcare (21%), and crime (12%).

*Now on a different topic. Compared to the national average, would you estimate the percentage of people age 60 and over living in [COUNTY] is ... (Q3)*
Is the senior community growing?

Overall, three-quarters of community leaders believe the 60+ population in their country is growing. Leaders in social services are more likely to perceive this population to be growing “quickly” (62%), while business leaders are least likely to perceive this population as growing “quickly” (35%).

Community leaders in high-growth communities are aware of the changing demographics in their area. Majorities of leaders in both high number and high percentage growth areas say the 60+ population is growing rapidly. Leaders in areas with stable numbers of 60+ residents tend to see this group’s as growing “slowly.”

*Is it your impression that the number of people age 60 and over in [COUNTY] is...* (Q4)
10. Understanding the Concerns of Age 60+ Residents

Understanding the needs of the 60+ community

Overall, community leaders say they believe they understand the needs of their age 60+ residents. Most say they have a “good” (55%) and some say “excellent” (29%) understanding of this group. This is true across sectors and type of county.

Social services (34%) and local government leaders (37%) – who might have more direct contact with seniors and their specific concerns – more often rate their understanding as “excellent,” especially compared to leaders in business and education (19% and 24% “excellent,” respectively).

| Perceived Level of Understanding of 60+ Residents’ Needs and Concerns (by Sector) |
|-------------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|
| Sector                        | Total             | Business          | Local Gov’t.      | Religion          | Education         | Social Svs.       |

*And do you feel you have an excellent, good, fair, or poor understanding of the needs and concerns of age 60+ residents? (Q6)*
Does the 60+ community adequately communicate its needs?

Most (70%) community leaders say they think the 60+ population does a “good” (40%) or “excellent” (30%) job letting them know their special needs and concerns. Leaders in rural counties are more likely to say they do only a “fair” or “poor” job (42%).

When we look at specific leadership sectors, we find that nine in ten (90%) local government leaders think residents age 60+ do an “excellent” (47%) or “good” (43%) job communicating their needs. Religious leaders, on the other hand, are least likely to say they think age 60+ residents do a good job communicating their needs. Nearly half (47%) of the religious leaders say they think age 60+ residents do a “fair” or “poor” job in this area.

*Do you think age 60+ residents do an excellent, good, fair, or poor job in letting you know what their special needs and concerns are? (Q5)*
11. Sector-Specific Impressions of the Importance and Impact of the 60+ Population

Perceived importance of 60+ residents to community life

Asked how vital a role the 60+ play in specific areas of community life, majorities of community leaders say they play an “essential” or “very important” role in:

- Local religious life (84% of the total, 93% of religious leaders)
- Business (82% in total, 84% of business leaders)
- Social services (72% in total, 62% of social services leaders)
- Local government (66% in total, 83% of government leaders)

Only when asked about education do fewer than half of the leaders say the 60+ play at least a very important role (46%), though over half (55%) of education leaders think they do.

These ratings generally hold across county types as well, with the interesting exception that leaders in communities with a high proportion of 60+ movers are more likely to say the 60+ play an “essential” or “very important” role in education than do those in counties with a high number of the 60+ movers (58% versus 29%, respectively).

*In your view, how important of a contribution do residents age 60 and over make to... the success of local commerce and business (Q13)/ functioning of [COUNTY]’s government (Q14)/local religious life, in churches, synagogues and other houses of worship, or through other means (Q15)/the quality of education in [COUNTY] (Q16)/community life in [COUNTY] (Q17) — Are they essential, very important but not essential, moderately important, not very important, or not important at all?*
Impressions of how others perceive the importance of 60+ residents to community life

Asked to assess how other people in their sector view the importance of the 60+ to the sector, majorities say they believe others see the 60+ as playing an “essential” or “very important” role. However, in two sectors, there is a gap between how leaders themselves view the importance of the 60+ and their assessment of how others view the 60+.

- Business leaders: 84% believe the 60+ play an “essential” or “very important” role in local business, whereas only 74% believe the business community in general feels the same way.

- Social services leaders: 62% believe the 60+ play an “essential” or “very important” role in the quality of community life, whereas more — 79% — believe the leaders of local social services feel the same way.

Apart from your own view, do you think... local business owners (Q18)/ county government officials (Q19)/clergy in local churches, synagogues and other houses of worship (Q20)/the local education system (Q21)/local social services (Q22) ... treat 60+ residents as essential, very important but not essential, moderately important, not very important, or not at all important to the success of their businesses?
12. Benefits and Challenges to the Community Posed by the 60+

Do seniors give or take more from their communities?

Community leaders have a generally positive view of their 60+ residents. Half (49%) believe such residents contribute more than they take from their communities, and the balance say it’s about an “even mix.” Very few believe the 60+ take more than they give.

Religious leaders and those living in counties with a large proportion of seniors are most likely to say the 60+ give more than they take (57% and 56%, respectively); education leaders and those living in stable urban areas are the least likely (38% and 36%).
## Whether the 60+ Are Perceived to Take More From or Contribute More to the Community

*On balance, do you think residents age 60 and over contribute more than they take from the community, or do they take more than they contribute, or would you say it's about an even mix? (Q10)*
Benefits to the community

Community leaders mention a wide range of contributions made by the 60+. They are most likely to say, top of mind:

- Good pool of volunteer workers (38%; especially likely to be mentioned by leaders in local government, 57%)
- Have experience others can learn from (34%)
- Economic benefits such as purchasing power, high taxable incomes, etc. (36%). This is least likely to be cited by leaders in both rural (8%) and urban areas (16%) of stable older populations.
- Solid/good/moral citizens (19%; most likely to be mentioned by religious leaders, 43%, and those in urban counties, 40%)
- Caring/supportive/dedicated people (12%)

Compared to leaders in areas with growing 60+ populations, leaders in urban areas with stable numbers of 60+ residents are less likely to attribute specific positive characteristics like volunteerism and experience to their older residents. Rather, a plurality (40%) say 60+ residents are good citizens. Residents age 60+ in these stable urban report being more engaged in their local community than new residents of growing communities.

Challenges to the community

Community leaders also mention a variety of challenges created by the 60+ in their counties. Most often mentioned are:

- Healthcare/medical needs of seniors (46%)
- Transportation (21%)
- Social services for seniors (9%)
- Low-income population (9%)
- Home care services (7%)

Clearly, community leaders are more than twice as likely to say the healthcare/medical needs of seniors create a challenge. One in five identify transportation as a challenge. A much smaller proportion say the remaining items will be a challenge.

Again thinking about the role of people age 60 and over in [COUNTY], in what ways do you think their presence presents special challenges to the local community? [OPEN END. RECORD VERBATIM. PROBE:] Anything else that comes to mind? (Q9a)
Younger and older residents — do their interests compete?

Four in ten (41%) community leaders see the interests of older and younger residents as mostly shared. Approximately three in ten see them as in competition (29%), or as having an even mix of shared and competitive interests (28%).

Most likely to say their interests are shared are business leaders (55%) and leaders in urban counties (56%).

Less than a third of county leaders (29%) see the interests of older and younger residents as being in competition with each other. Leaders are most likely to see the interests as being shared (41%) while another 28% see a combination of shared and competitive interests.
### Whether or Older and Younger Residents Are Perceived to Have Shared or Competing Needs and Concerns

*On balance, do you think older and younger residents have mostly shared needs and concerns, or mostly competing needs and concerns? (Q11)*
13. Addressing the Needs of the 60+ Population

Perceived quality of the county for 60+ residents

Three in four community leaders agree their county is “above average” or “one of the best in the country” for people age 60 and over to live in (77%). Very few believe it is “below average” or “one of the worst” (4%).

Business leaders are particularly likely to believe the county is “one of the best” (74%). Social services leaders are the least likely to believe this (17%). Leaders in stable urban communities are much less likely to say their county is “one of the best” (8%), preferring instead to describe it as “above average” (64%).

*All things considered, do you think [COUNTY] is one of the best in the country for people age 60 and over to live in, above average, about average, below average, or one of the worst? (Q23)*
Making an effort to be hospitable to the 60+

The majority of community leaders surveyed agree — across sectors — that their communities had “made a special effort to encourage persons age 60 and over to move or stay” there (59%). Leaders in counties with a high rate of growth are more highly likely to say a special effort has been made by their community (72% agree). By contrast, in stable urban counties only 32% of leaders agree that a special effort has been made to attract new 60+ residents.

Whether or Not Community Has Made a Special Effort to Encourage the 60+ to Move to County (by Sector)

Base: Total community leaders surveyed.

In your opinion, has this community made a special effort to encourage persons age 60 and over to move or stay here, or not? (Q28)
Perceived quality of local leaders’ efforts to address the needs of 60+ residents

As a rule, leaders believe other leaders in their sector have been able to do a “good” (58%) — though not “excellent” (19%) — job of addressing the needs and concerns of 60+ members of the community.

Most likely to believe their fellow leaders do only a “fair” job are those living in stable urban counties (32%, compared to 19% on average).

And do you feel local leaders beside yourself in [INSERT SECTOR] have been able to do an excellent, good, fair, or poor job of addressing the needs and concerns of age 60+ residents? (Q7)
Does the county pay too much or not enough attention to its 60+ residents?

By about a six to one margin, community leaders believe their “county really needs to start paying more attention to the needs of its age 60+ residents” (44%) rather than that “sometimes this county puts too much emphasis on the needs of its over-60 residents, at the expense of others” (7%).

This perspective is most common among social service and education leaders, and those living in stable rural counties (where no leaders believe the county puts too much emphasis on the 60+). It is least common among local government leaders.

Relatively few leaders agree their county “is sometimes overwhelmed by the services required by its residents age 60 and over” (23%). Most likely to agree that they are overwhelmed are religious leaders.

*Please tell me whether you completely agree, mostly agree, neither agree nor disagree, mostly disagree, or completely disagree with each of the following statements. (Q12)*
Perceived importance of specific county services/aspects to 60+ residents

As asked to rate the importance of a variety of community services and aspects, community leaders are most likely to say the following are “essential” or “very important”:

**Health care**
- Good hospitals (96%; cited as the *most* important by 11% of community leaders in total and 23% of business leaders)
- High quality doctors and specialists are close by (94%; 11% of leaders believe this is the most important)
- Availability of in-home medical and personal services (91%; 29% of leaders in urban communities agree it is the most important)

**Cost of living**
- Affordable cost of living (90%; 19% of leaders surveyed believe it is the most important, including 29% of business leaders. 29% of leaders in communities with a high number of 60+ residents also agree it is the most important)
- Affordable housing (87%; 21% of leaders say it is the most important, including 38% of social services leaders)
- Low local taxes (74%; cited by 10% of local government and education leaders as the most important)

**Religion**
- A church, temple, or mosque or other house of worship to belong to (86%)

**Crime**
- Low crime (85%)

**Social/volunteer opportunities**
- Opportunities to meet and make friends with peers (83%)
- Opportunities to do volunteer or charity work (73%)

**Government services/transportation**
- High quality local government services (77%). Business leaders are much more likely than education leaders to see this as at least “very important” (90% versus 62%, respectively).
- Convenient and reliable public transportation for people with physical disabilities (73%; 10% of local government leaders believe it is the most important)
Housing
• A variety of housing options for older citizens (77%)

Shopping/services
• Close, convenient shopping and services (77%)

And of the items I just read, which one do you think is the most important factor for people age 60+ who decide to move to or stay in [COUNTY] County? [READ LIST AS NECESSARY.] (Q26a)
Perceived quality of specific county services/ aspects for 60+ residents

Community leaders were also asked to rate the quality of the same county services/aspects for age 60+ residents. Here is how the leaders rate their counties on the top ten items they feel are most important for their 60+ residents:

Areas of strength:

- A church, temple, or mosque or other house of worship to belong to: Here community leaders believe their county excels: 93% say their county does an “excellent/good” job, the highest quality rating given.
- Opportunities to meet and make friends with peers: 82% say their county does an “excellent/good” job, the fourth highest quality rating offered.
- Good hospitals: 81% of leaders say their county does an “excellent” or “good” job providing good hospitals, the fifth highest quality rating (out of 21 items) offered by leaders.
- High quality doctors and specialists are close by: 81% say their county does an “excellent/good” job, the fifth highest quality rating offered by leaders (ties with “good hospitals”).
- High quality local government services: 79% offer an “excellent/good” rating, the sixth highest quality rating offered.

Good, but room for improvement:

- Low crime: 72% say their county does an “excellent/good” job, the eleventh highest quality rating offered.
- Availability of in-home medical and personal services: 70% say their county does an “excellent/good” job, the thirteenth highest quality rating offered by leaders.

Weaknesses:

- Affordable housing: Only 45% say their county does an “excellent/good” job, the second lowest quality rating offered.
- Affordable cost of living: Only 53% say their county does an “excellent/good” job, the sixth lowest quality rating given.
- Low local taxes: Only 54% say their county does an “excellent/good” job, the sixth lowest quality rating offered.
**Perceived Quality of Specific County Services/Aspects for 60+ Residents**

Appendices
Appendix 1: Demographic Information

Sample
A total of 1,201 interviews were conducted — 30 interviews in each of the following 40 communities:

1) Moved within past 5 years to a county with a high proportion of movers age 60+ (N = 301):

- Sumter County, Florida (Orlando)
- Douglas County, Colorado (Denver)
- Washington County, Utah (Salt Lake City)
- James City County, Virginia (Norfolk)
- Williamson County, Texas (Austin)
- Pinal County, Arizona (Phoenix)
- Beaufort County, South Carolina (Savannah, GA)
- Placer County, California (Sacramento)
- Cumberland County, Tennessee (Knoxville)
- Deschutes County, Oregon (Bend)

2) Moved within past 5 years to a county with a high number of movers age 60+ (N = 300):

- Maricopa County, Arizona (Phoenix)
- Riverside County, California (Los Angeles)
- Clark County, Nevada (Las Vegas)
- Broward County, Florida (Miami-Fort Lauderdale)
- San Diego County, California (San Diego)
- Pinellas County, Florida (Tampa-St Petersburg)
- Lee County, Florida (Ft Myers-Naples)
- Pima County, Arizona (Tucson)
- Ocean County, New Jersey (New York)
- Suffolk County, New York (New York)
3) Have lived for past 5-plus years in a metro/urban county N = 300):

- Erie County, New York (Buffalo)
- Allegheny County, Pennsylvania (Pittsburgh)
- Wayne County, Michigan (Detroit)
- Lucas County, Ohio (Toledo)
- Kanawah County, West Virginia (Charleston)
- Milwaukee County, Wisconsin (Milwaukee)
- St. Clair County, Illinois (St Louis)
- Rockingham County, North Carolina (Greensboro)
- Pottawattamie County, Iowa (Omaha)
- Hampden County, Massachusetts (Springfield)

4) Have lived for past 5-plus years in a non-metro/rural county (N = 300):

- Burke and Sheridan Counties, North Dakota (Minot) - treated as one given small size of each and proximity
- Zavala County, Texas (San Antonio)
- Marshall County, South Dakota (Sioux Falls)
- Union County, South Carolina (Union)
- Pierce County, Nebraska (Sioux City)
- Harlan County, Kentucky (Knoxville)
- Webster County, West Virginia (Clarksburg)
- Hardin County, Ohio (Kenton)
- Aroostook County, Maine (Presque Isle)
- St Lawrence County, New York (Watertown)

</table>

MAIN SURVEY

I would like to ask you some questions about living in this area.

1. [Base = Movers, n=601] Who in your household made the primary decision to move to [COUNTY] County? Was it made mostly by you, your spouse, both you and your spouse together, or by someone else? If you have lived here since you were a child, just let me know.

<table>
<thead>
<tr>
<th>Decision Maker</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>Myself</td>
<td>27</td>
</tr>
<tr>
<td>Spouse</td>
<td>6</td>
</tr>
<tr>
<td>Myself and spouse</td>

</table>

D2. And what kind of place are you living in—is it a...

<table>
<thead>
<tr>
<th>Type</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single family home</td>
<td>77</td>
</tr>
<tr>
<td>Duplex or townhouse</td>
<td>4</td>
</tr>
<tr>
<td>Apartment or condominium, [IF NECESSARY: -MULTI-FAMILY UNIT WITH 3 OR MORE UNITS]</td>
<td>12</td>
</tr>
<tr>
<td>Mobile home or trailer</td>
<td>5</td>
</tr>
<tr>
<td>Or some other type of structure? [SPECIFY:]</td>
<td>2</td>
</tr>
<tr>
<td>DK/REF.</td>
<td>1</td>
</tr>
</tbody>
</table>

D3. Do you live in a senior or retirement community, or not?

<table>
<thead>
<tr>
<th>Option</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>32</td>
</tr>
<tr>
<td>No</td>
<td>67</td>
</tr>
<tr>
<td>DK/REF.</td>
<td>1</td>
</tr>
</tbody>
</table>

D4. How well do you think your home will be able to meet your physical needs as you grow older?

<table>
<thead>
<tr>
<th>Opinion</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>Very well</td>
<td>61</td>
</tr>
<tr>
<td>Fairly well</td>
<td>28</td>
</tr>
<tr>
<td>Not very well</td>
<td>5</td>
</tr>
<tr>
<td>Not well at all</td>
<td>4</td>
</tr>
<tr>
<td>Don’t know</td>
<td>2</td>
</tr>
<tr>
<td>Refused</td>
<td>1</td>
</tr>
</tbody>
</table>
### D5. In what year were you born? (Recoded to age)

<table>
<thead>
<tr>
<th>Age Group</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>60-64</td>
<td>28</td>
</tr>
<tr>
<td>65-69</td>
<td>23</td>
</tr>
<tr>
<td>70-74</td>
<td>18</td>
</tr>
<tr>
<td>75-79</td>
<td>15</td>
</tr>
<tr>
<td>80-84</td>
<td>10</td>
</tr>
<tr>
<td>85 or older</td>
<td>4</td>
</tr>
<tr>
<td>Refused</td>
<td>2</td>
</tr>
</tbody>
</table>

Mean: 70.4 years

### D6. Are you currently employed full-time, part-time, or are you not currently employed?

<table>
<thead>
<tr>
<th>Employment Status</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes, full time</td>
<td>8</td>
</tr>
<tr>
<td>Yes, part time</td>
<td>9</td>
</tr>
<tr>
<td>No, not employed</td>
<td>82</td>
</tr>
<tr>
<td>DK/REF.</td>
<td>1</td>
</tr>
</tbody>
</table>

### D7. [BASE = WORKING FULL- OR PART-TIME IN D6] Have you retired from a previous career, or not?

<table>
<thead>
<tr>
<th>Status</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>45</td>
</tr>
<tr>
<td>No</td>
<td>55</td>
</tr>
<tr>
<td>DK/REF.</td>
<td>-</td>
</tr>
</tbody>
</table>

### D8. [BASE = WORKING FULL- OR PART-TIME IN D7] At about what age do you plan to stop working?

<table>
<thead>
<tr>
<th>Age Group</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>60-64</td>
<td>7</td>
</tr>
<tr>
<td>65-69</td>
<td>25</td>

AARP: IMPACT OF AGING POPULATIONS ON LOCAL COMMUNITIES

Survey Among Community Leaders

POSTED QUESTIONNAIRE

PREPARED BY
GfK NOP / ROPER PUBLIC AFFAIRS
I would like to ask you some questions about your community.

1. What do you think are the special strengths of [COUNTY], the key reasons someone would want to live here? Please answer generally as well as in terms of matters of [INSERT PHRASE APPROPRIATE FOR LEADER] business/local government/religion/education/social services. [OPEN END. RECORD VERBATIM. PROBE:] Any other special strengths that come to mind?

<table>
<thead>
<tr>
<th>Environmental Aspects</th>
<th>%</th>
</tr>
