

Elderly Demographics and the need for a Community Focus

Coalition of Service Providers

Moorhead, MN

November 1, 2007

Dr. Richard Rathge
Professor and Director
North Dakota State Data Center

Presentation Objective:

1. To place the shifting age distribution into historical context.
2. To illustrate current and future changes in elderly population within the region

Key Contextual Themes

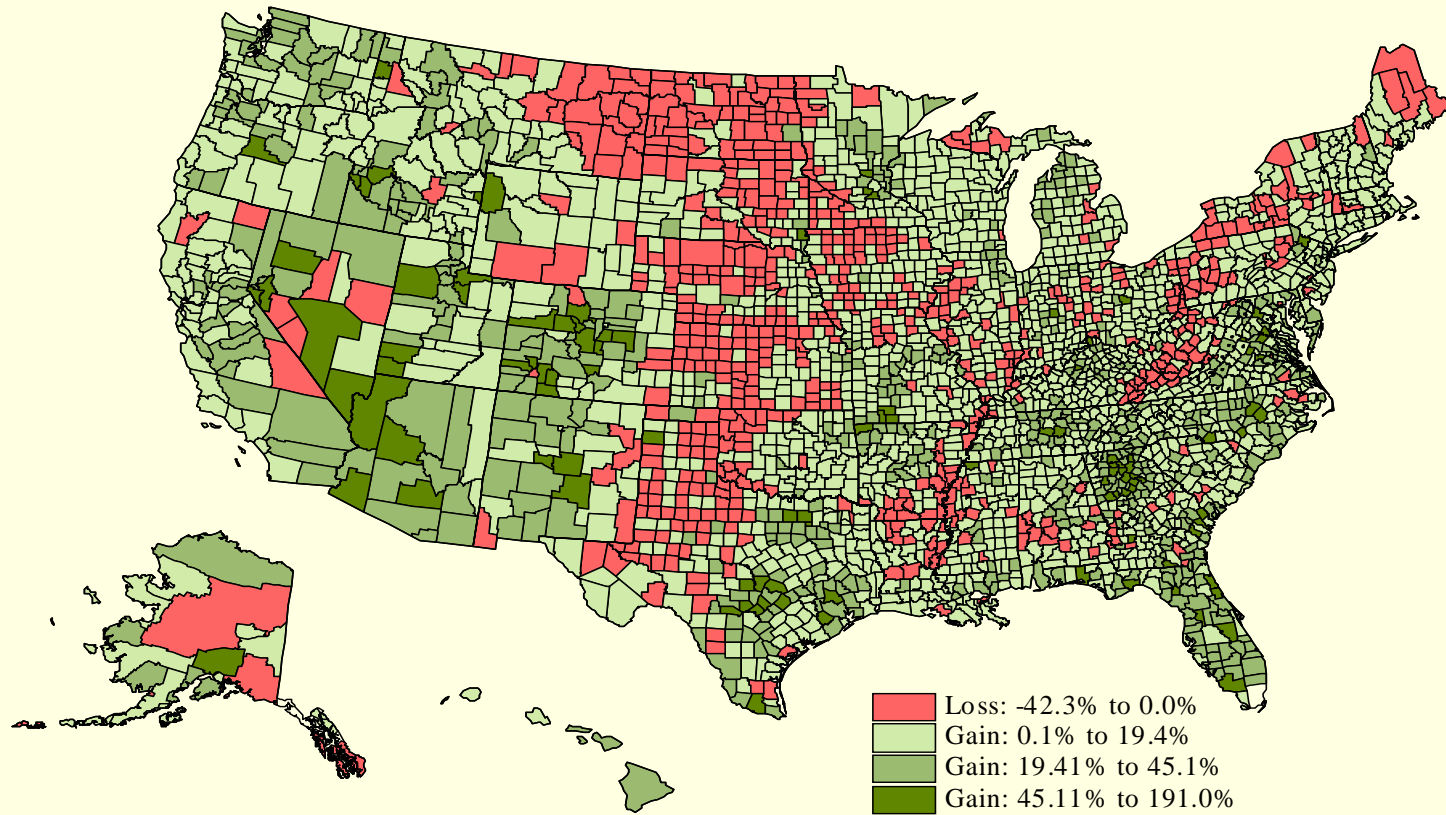

1. Differing Patterns of Population Change
2. Rapidly shifting age distribution
3. Consequences of changing patterns

Key Contextual Themes

- 1. Differing Patterns of Population Change**
2. Rapidly shifting age distribution
3. Consequences of changing patterns

Percentage Change in Total Population

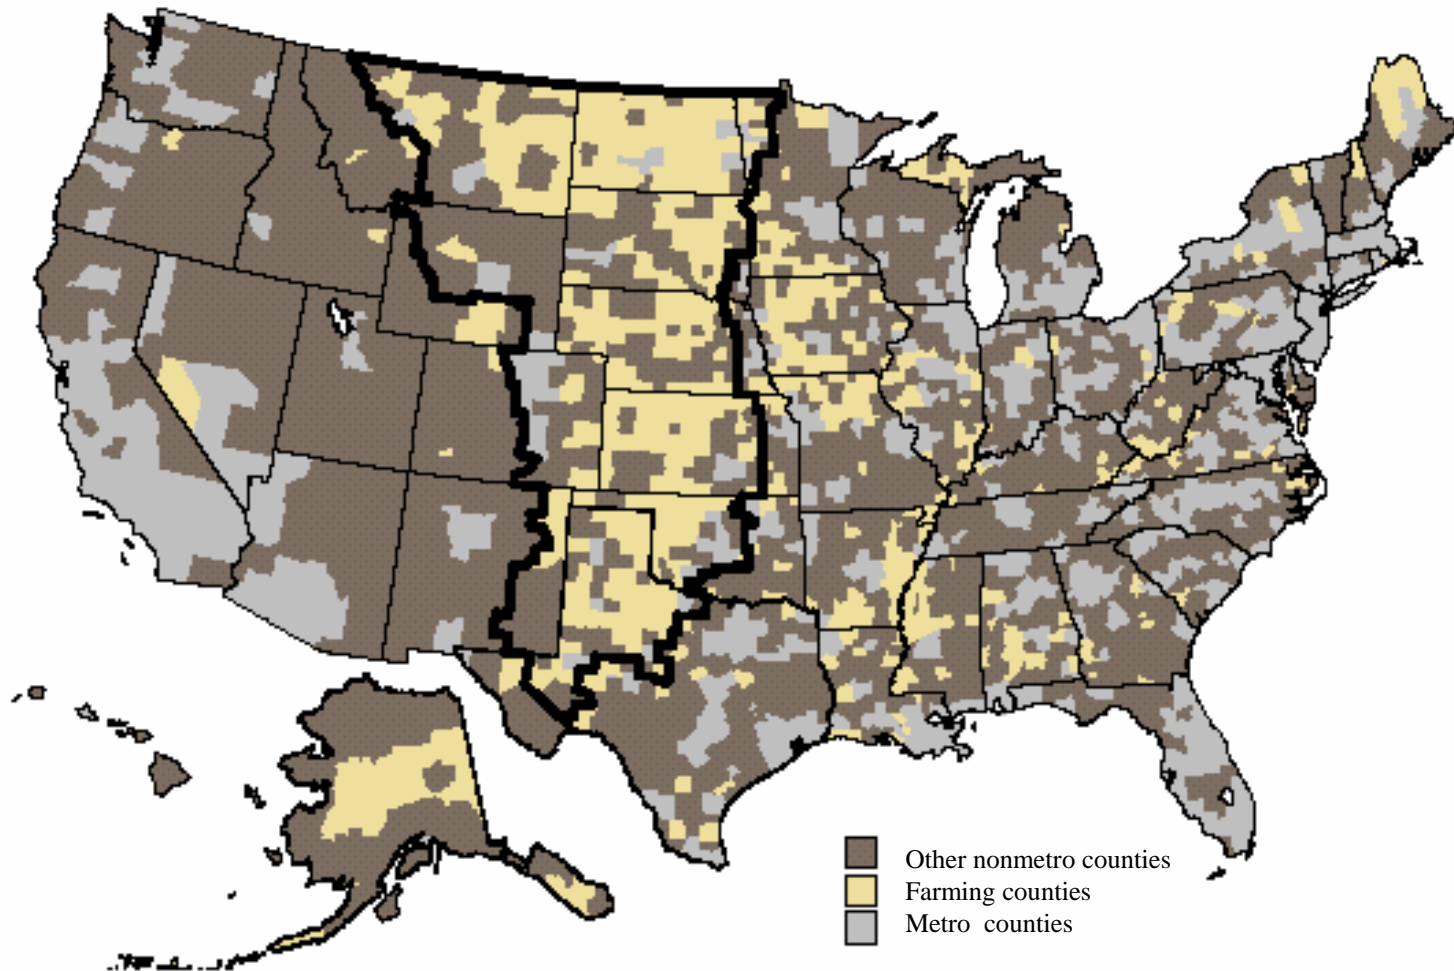

U.S. Counties: 1990 to 2000

Source: U.S. Census Bureau, 2000 Census
Prepared by: North Dakota State Data Center, April 2001

Nonmetro Farming-Dependent Counties, 1989

Counties with 20 percent or more of income (labor or proprietor) from farming

Net Domestic Migration Rates Per 100 Persons in the United States by County: 1990 to 1999

Source: U.S. Census Bureau, Population Estimates Branch.

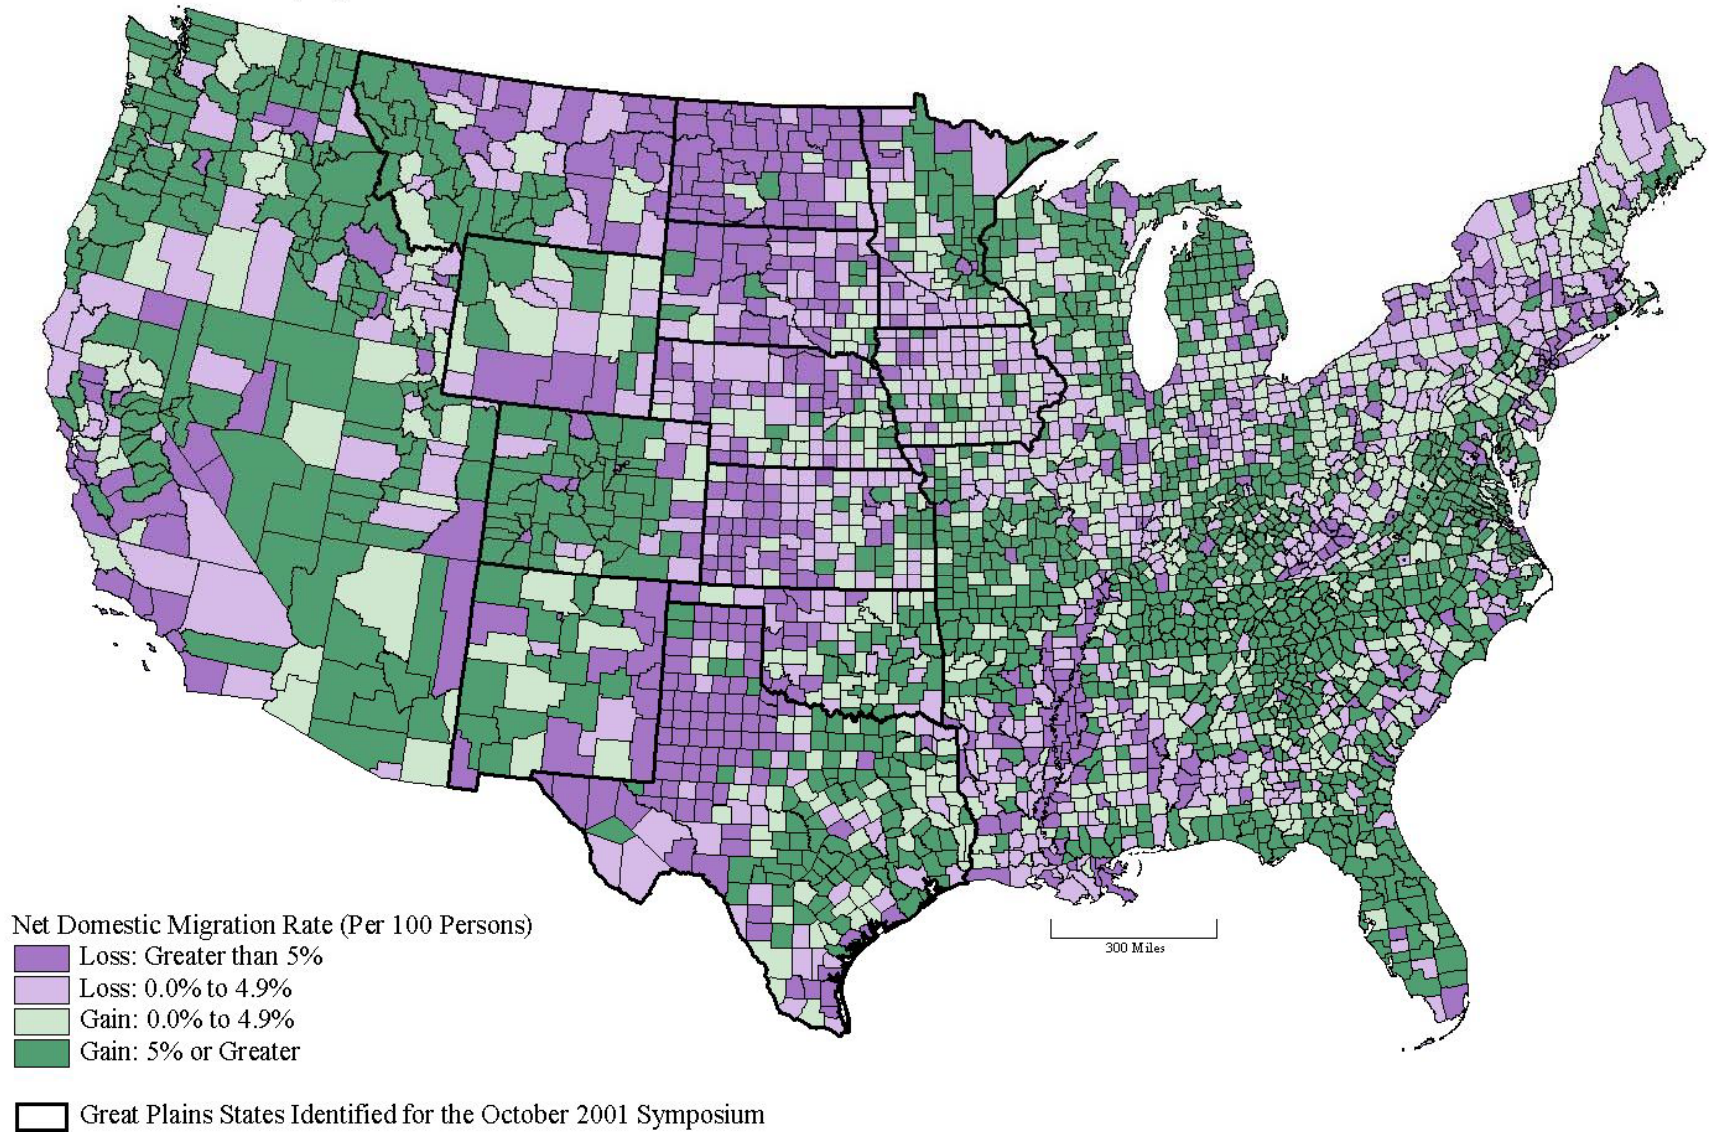

Figure 2. Age-Specific Net Migration: Farm

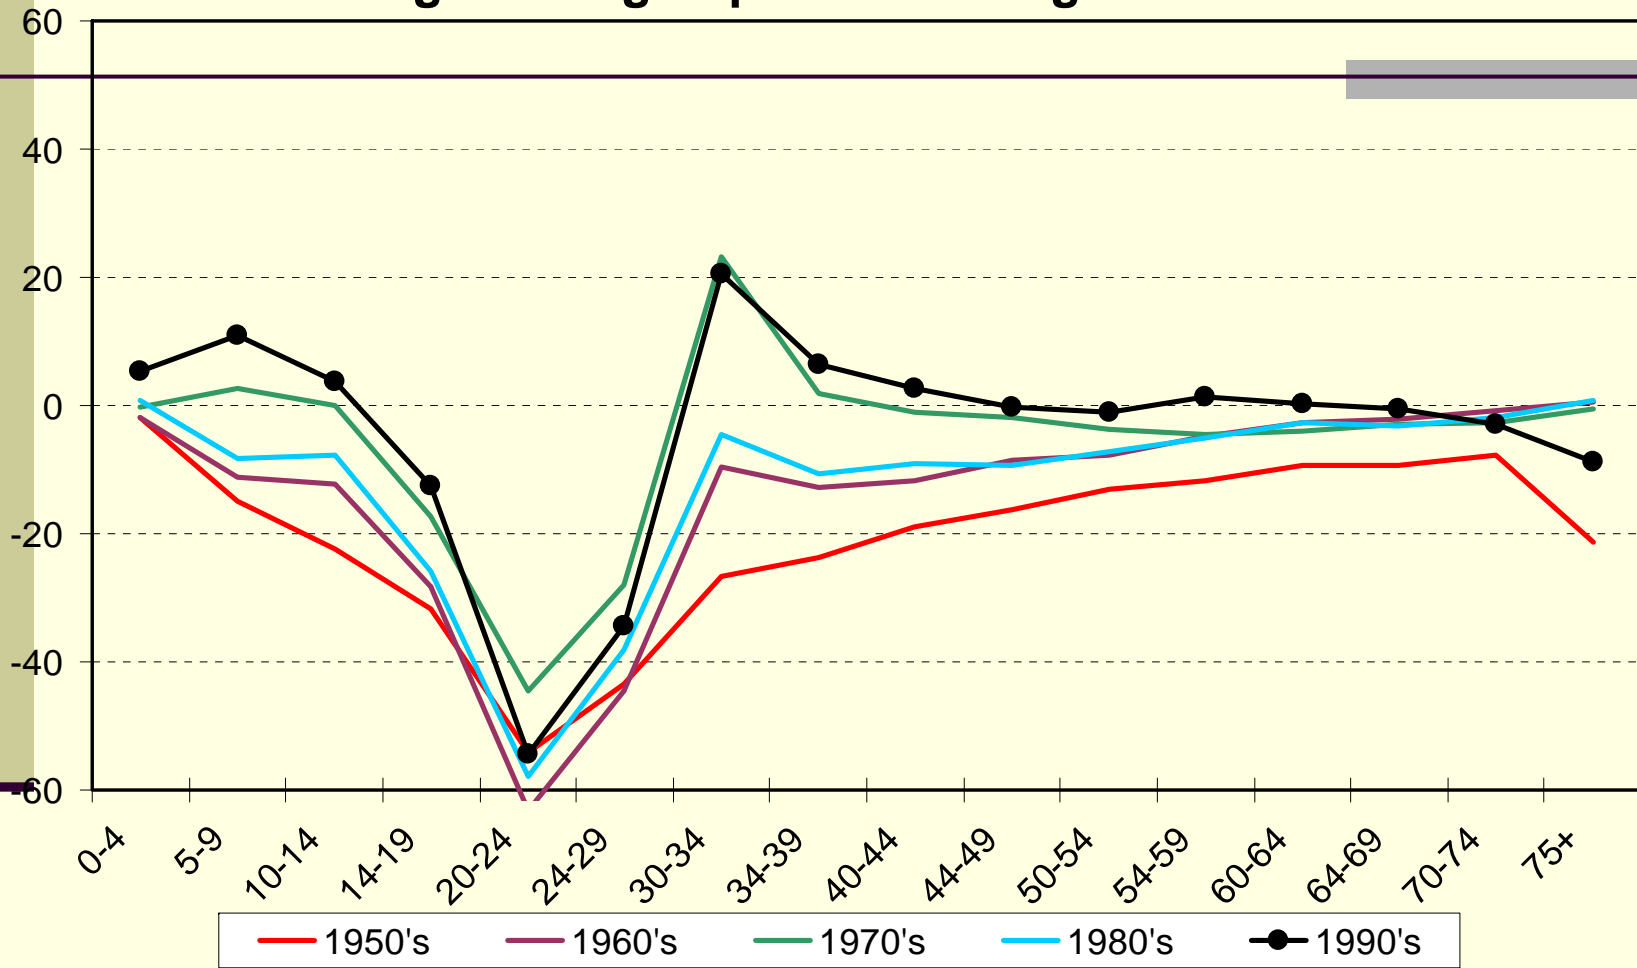

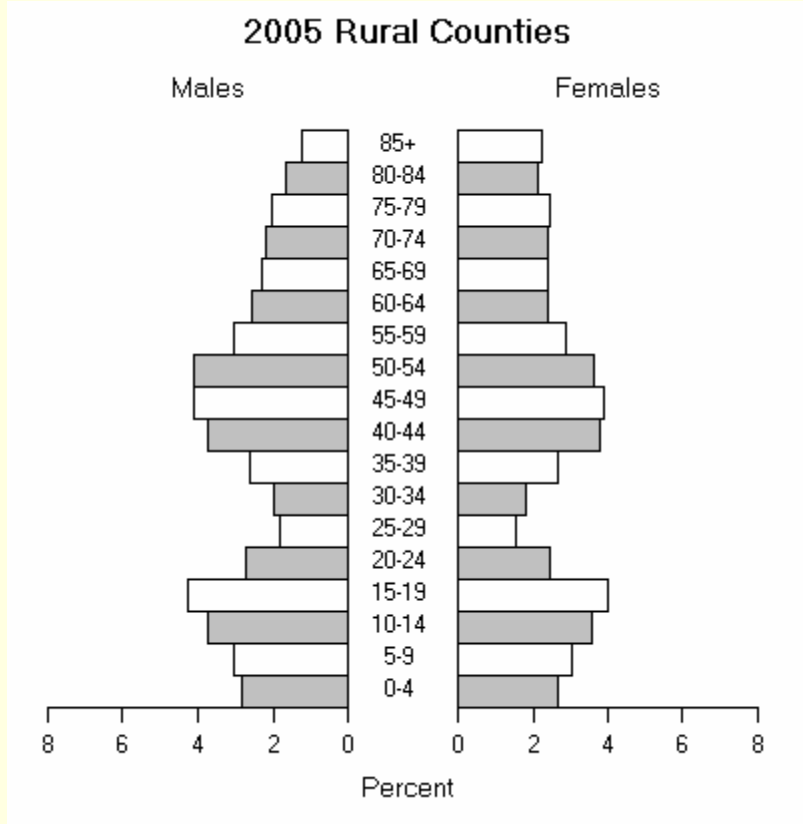

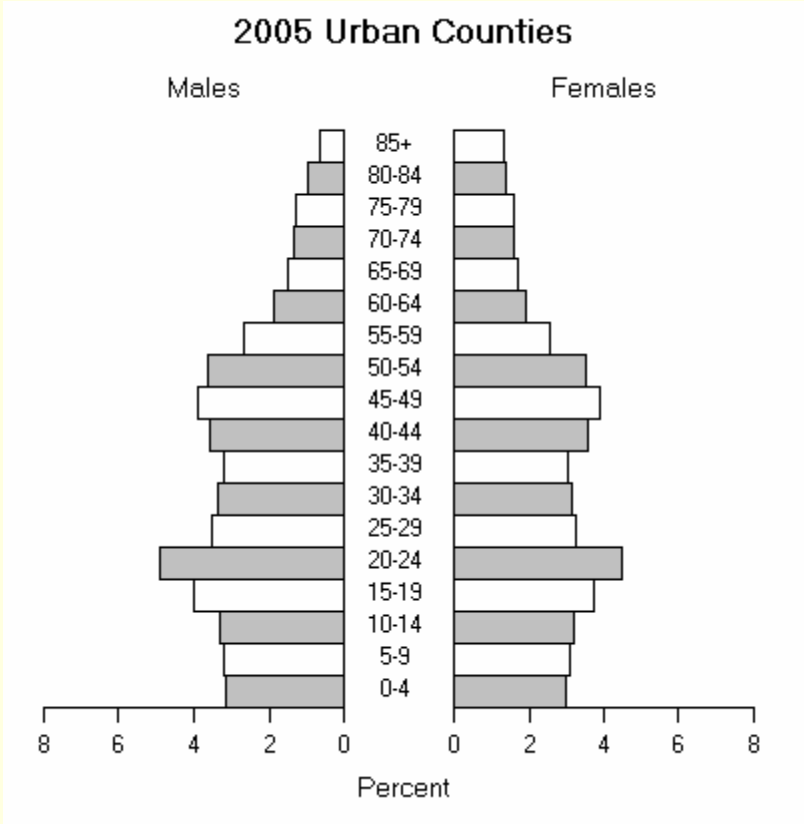

Figure 4. Age-Specific Net Migration: Metro

2005 Projections – Rural and Urban Population Distributions by Age and Gender for North Dakota

Population of Persons Ages 0 to 9 and Ages 65 and Older

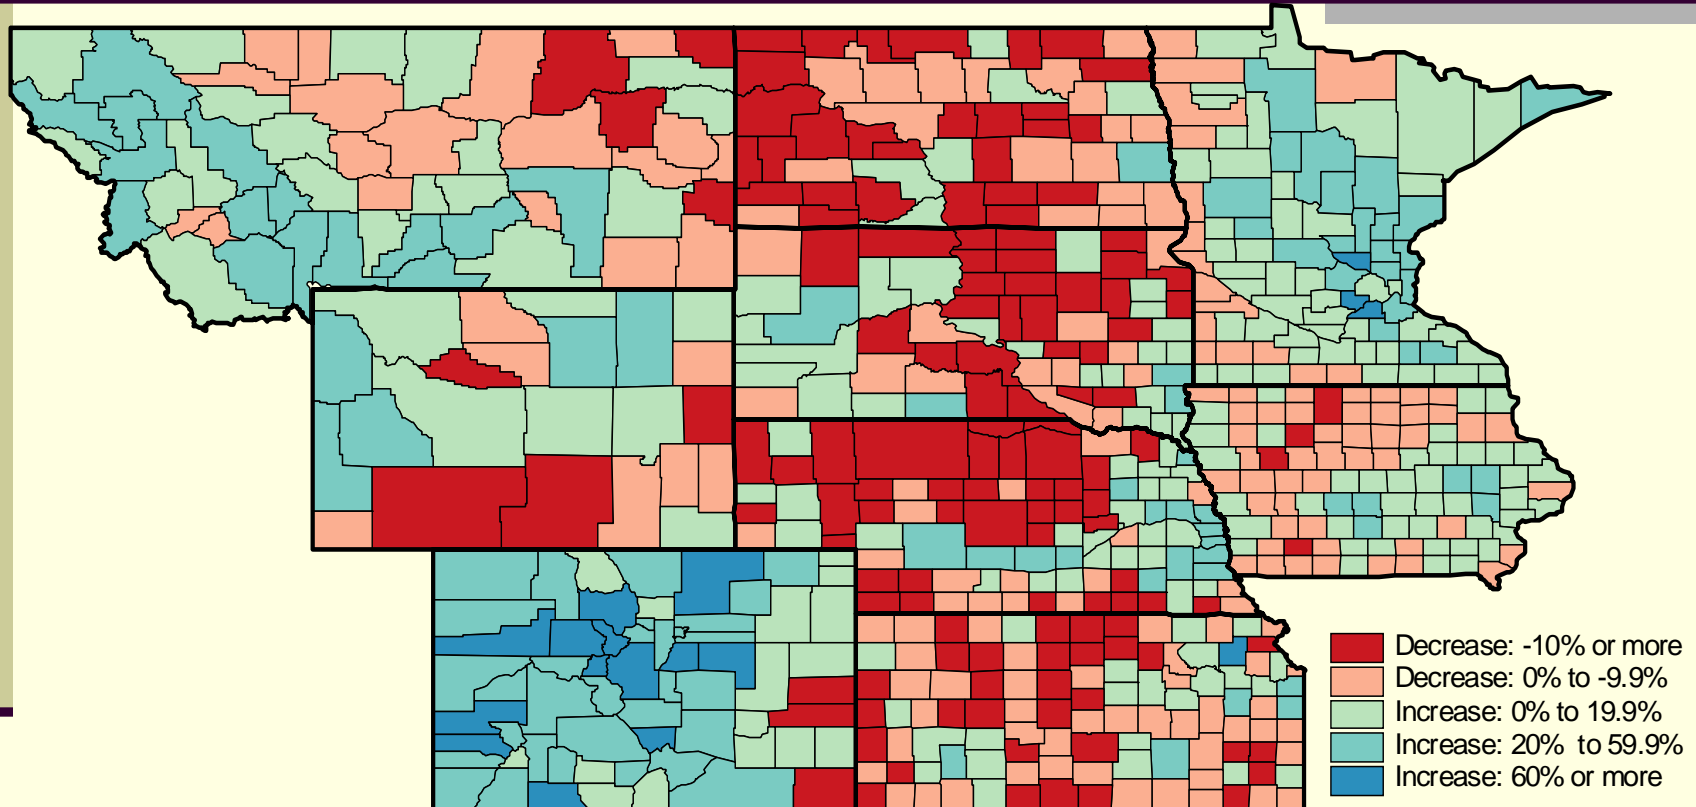

North Dakota: 1890 to 2020

Projected Percent Change in Total Population in the Great Plains States by County: 2000 to 2020

Note: For purposes of this study, the Great Plains is defined as all counties in Colorado, Iowa, Kansas, Minnesota, Montana, Nebraska, North Dakota, South Dakota, and Wyoming.
